# Business Function Model Template

## What is Business Function Model Template?

The Business Function Model Template is a strategic tool used within enterprise architecture frameworks, such as TOGAF, to systematically categorize and visualize an organization's functions and processes. It serves as a foundational component that aids in aligning business strategies with operational capabilities by mapping out various functions, their interdependencies, and the services they provide. This model enables stakeholders, including architects and project managers, to identify areas for improvement, facilitate communication across business units, and ensure that the architecture supports organizational goals. By employing this template, practitioners can effectively analyze and optimize business processes, thereby enhancing overall performance and agility in response to changing market demands.
