Change Request Form Template

What is Change Request Form Template?

A Change Request Form Template is a structured document used in enterprise architecture and project management to formally propose modifications to a project or system, following established best practices and frameworks like TOGAF (The Open Group Architecture Framework). This template typically includes sections for detailing the nature of the change, its justification, impact analysis, and any associated risks or benefits, ensuring that all stakeholders can assess and understand the implications of the proposed adjustment. By utilizing a standardized template, organizations can maintain clarity, consistency, and traceability in their change management processes, facilitating informed decision-making and ensuring alignment with strategic architectural goals. This approach not only helps in improving project outcomes but also reinforces governance and compliance within the enterprise architecture practice.
