Performance Review Template

What is Performance Review Template?

A Performance Review Template is a structured tool used by organizations to evaluate and provide feedback on employee performance, aligning individual contributions with business objectives and strategic frameworks, such as TOGAF (The Open Group Architecture Framework). In the context of an Enterprise Solution Architect or Architecture Project Manager, this template typically incorporates best practices that ensure assessments are comprehensive, consistent, and aligned with both organizational goals and architectural standards. It may include criteria for evaluating competencies, project outcomes, alignment with architectural principles, and contributions to the organization's overarching architecture vision. By utilizing a well-defined Performance Review Template, organizations can foster a culture of continuous improvement, ensuring that employee performance is measured against both qualitative and quantitative benchmarks that align with the enterprise's architectural framework.
