- [Enterprise](#)
- [Embedded](#)

All Programming languages	Description	Embedded
Assembly	low-level programming language	Yes
C	C is used to write software where speed and flexibility is important, such as in embedded systems or high-performance computing.	Yes
C++	C++ is a general-purpose programming language	Yes
Ruby	Ruby is an interpreted, high-level, general-purpose programming language.	Yes
Rust	Rust is a multi-paradigm, general-purpose programming language. Rust emphasizes performance, type safety, and concurrency	Yes
Scala	general-purpose programming language providing support for functional programming and a strong static type system	Yes
SQL	Domain-specific language used in programming and designed for managing data held in a relational database management	Yes
Swift	Swift is a general-purpose, multi-paradigm, compiled programming language	Yes
Visual Basic	Event-driven programming language	Yes
Zig	Zig is a general-purpose programming language and toolchain for maintaining robust, optimal and reusable software	Yes
