DevOps Plan

- [DevOps](#)
- [Toolchain](#)
- [Roadmap](#)
- Stages
 - [Plan](#)
 - [Create](#)
 - [Verify](#)
 - [Packaging](#)
 - [Release](#)
 - [Configure](#)
 - [Monitor](#)

Planning provide transparency to stakeholders. **Stages of DevOps**

DevOps Plan refers to the business value and application requirements. Planning activities include:

- Production metrics, objects and feedback
- Requirements (both Functional and Non Functional Requirements)
- Business metrics
- Update release metrics
- Release plan, timing and business case
- Security policy and requirement

- [DevOps Plan](#)
- [DevOps Create](#)
- [DevOps Verify](#)
- [DevOps Packaging](#)
- [DevOps Release](#)
- [DevOps Configure](#)
- [DevOps Monitor](#)

A combination of the IT personnel will be involved in these activities: business application owners, software development, software architects, continual release management, security officers and the organization responsible for managing the production of IT infrastructure.

Disciplines & Methodologies
