- Claris, a subsidiary of Apple Inc (🇺🇸)

Take on digital transformation with Claris FileMaker. Quickly build custom apps that solve your business problems today — and tomorrow. Accelerate your business, unlock your team's creative potential, and drive to better outcomes.

Snippet from [Wikipedia](#): **FileMaker**

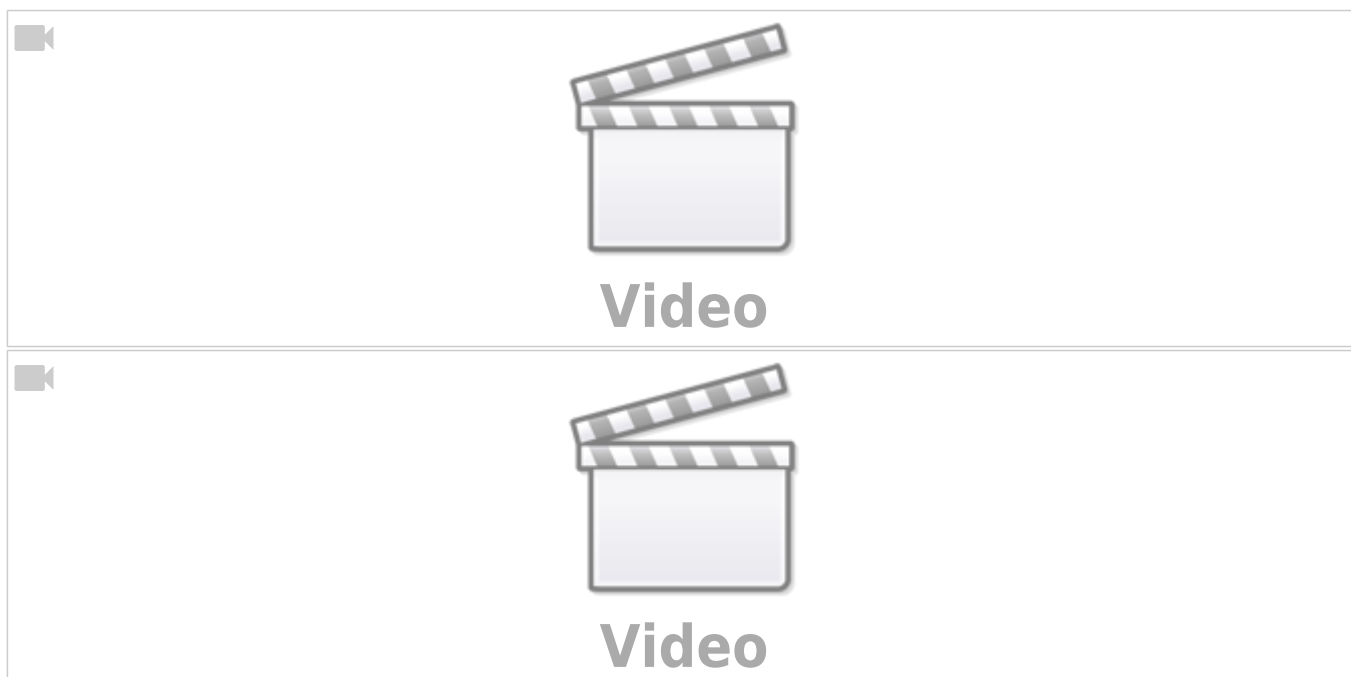

FileMaker is a cross-platform relational database application developed by Claris International, a subsidiary of Apple Inc. It integrates a database engine with a graphical user interface (GUI) and security features, allowing users to visually modify a database. Versions for desktops, servers, iOS and web-delivery have been released.

The desktop app is based on a DOS application originally named *FileMaker*, which was then developed primarily for the Apple Macintosh and released in April 1985. It was rebranded as *FileMaker Pro* in 1990. Since 1992 it has been available for Microsoft Windows and for the classic Mac OS and macOS, and has cross-platform capabilities.

FileMaker Go, the mobile app, was released for iOS devices in July 2010.

FileMaker Server allows centralized hosting of apps which can be used by clients running both the desktop and mobile apps. A cloud variant, named *FileMaker Cloud*, is hosted by Claris.
