Snippet from *Wikipedia*: **FileMaker**

FileMaker is a cross-platform relational database application from Claris International, a subsidiary of Apple Inc. It integrates a database engine with a graphical user interface (GUI) and security features, allowing users to modify the database by dragging new elements into layouts, screens, or forms. It is available in desktop, server, iOS and web-delivery configurations.

FileMaker Pro, the desktop app, evolved from a DOS application, originally called simply *FileMaker*, but was then developed primarily for the Apple Macintosh and released in April 1985. It was rebranded as *FileMaker Pro* in 1990. Since 1992 it has been available for Microsoft Windows and for the classic Mac OS and macOS, and can be used in a cross-platform environment.

FileMaker Go, the mobile app, was released for iOS devices in July 2010.

FileMaker Server allows centralized hosting of apps which can be used by clients running the desktop or mobile apps. It is also available hosted by Claris, called *FileMaker Cloud*.
