Snippet from [Wikipedia](#): **Visual Studio Code**

Visual Studio Code, also commonly referred to as **VS Code**, is a source-code editor developed by Microsoft for Windows, Linux and macOS. Features include support for debugging, syntax highlighting, intelligent code completion, snippets, code refactoring, and embedded Git. Users can change the theme, keyboard shortcuts, preferences, and install extensions that add functionality.

In the Stack Overflow 2023 Developer Survey, Visual Studio Code was ranked the most popular developer environment tool among 86,544 respondents, with 73.71% reporting that they use it. The survey also found Visual Studio Code to be used more by those learning to code than by professional developers (78% vs. 74%).
